Measured pressure-free particle growth: Ferrers F2 gravity
Axis modes; density correction targets z=9 from z=49
Density-branch force eigenvalue λ
Initial density amplitude multiplier
Velocity / displacement correction $f_\lambda/f_1$
Growing-mode species displacement / total
$|\mathbf{k}|/(\pi N/L)$
Adaptive gas + DM, N=8
Adaptive DM, N=8
Fixed gas + DM, matched support
Fixed continuum W(kH)
Adaptive gas + DM, N=16
